ProTect

Historical records and books, original documents, deeds, contracts, trademarks, patents, film, and samples are all valuable materials that cannot risk damage or destruction. Recall's ProTect solution provides state-of-the-art, climate-controlled, high-security vault protection for items of high intrinsic value.

ProTect offers:

- Secure facilities built to sustain severe weather, and other natural disasters, such as tornadoes, hurricanes, flooding and earthquakes
- Climate-controlled environments tailored to the sensitive needs of paper, photographs, media and fabric
- Unlimited access to storage facilities
- Personalized support to assist you with any specialized needs your item requires

State-of-the-art protection

With ProTect, your valuable information is safeguarded by:

- Closed-circuit television cameras monitoring all vault access points
- Recorded, restricted biometric access
- Two hour fire-rated walls, roof and doors
- Anti-static flooring
- Seismic sensors
- Waterless fire suppression system
- Redundant climate controls providing constant temperature and relative humidity (monitored by hygrometers)
- Back-up generators to guarantee temperature and relative humidity

Peace of mind

You trust Recall to securely manage your information needs – from storage to digitization to destruction. Trust us to safeguard your important and irreplaceable items. When it's important to you, when it can't be replaced – ProTect it.
